

# HRISHIKESH JOSHI

Senior Systems Administrator | Azure Solutions Architect (AZ-305)

@ joshihrishikesh42@gmail.com [linkedin.com/in/hrishikesh-joshi-334b08159](https://www.linkedin.com/in/hrishikesh-joshi-334b08159) [Pune, India](#)

## SUMMARY

Senior Systems Administrator with 11+ years of enterprise infrastructure experience across hybrid cloud, on-premises, and Microsoft 365 environments. Deep hands-on ownership of Azure compute, networking, hybrid identity (Microsoft Entra ID, Conditional Access, MFA), BCDR (Azure Site Recovery), and endpoint security across a multi-client managed services portfolio covering pharmaceutical, manufacturing, renewable energy, and software companies. Track record spans ransomware recovery at scale, automated CVE remediation pipelines, Azure cost governance against BOQ commitments, OT/IT integration under GxP, and pre-sales solution architecture combining deep technical delivery with customer-facing documentation and governance.

## EXPERIENCE

### Senior Systems Administrator & Cloud Architect

#### I- Source Info Systems Pvt. Ltd

01/2021 – Present [Pune, IN](#)

- Design, deploy, and operate enterprise infrastructure across Microsoft Azure and private cloud for a multi-client portfolio spanning pharmaceutical, manufacturing, renewable energy, and software companies - 1,000+ users and 500+ servers at 99.9% availability.
- Architected Azure VM Scale Sets in flexible orchestration mode with golden-image creation, versioning, and automated patch lifecycle management, reducing manual provisioning effort and standardizing deployments.
- Led Azure Site Recovery implementation for business-critical workloads - replication policy design, failover testing, and BCDR documentation - improving RTO/RPO posture and compliance readiness.
- Implemented hybrid identity with Azure AD Connect (Password Hash Sync) across 10+ client environments; designed Conditional Access and MFA policies enforcing Zero Trust access with no user productivity impact.
- Led ransomware recovery of 100+ compromised servers: rebuilt and hardened Windows security baselines, deployed next-generation antivirus, and rolled out Zscaler proxy across 500+ endpoints through to full restoration of operations.
- Designed and POC-validated a multi-tenant Database Activity Monitoring (DAM) solution on OpenSearch with document-level security and agentless WEF/OpenWEC log collection from SQL Server.
- Drove an Intune co-management exit for a Microsoft Entra hybrid-joined Windows 11 fleet - ConfigMgr client removal and native Update Ring policy configuration - inside an AppLocker/WDAC-restricted environment where PowerShell execution is blocked.
- Operate daily Microsoft Defender Antivirus fleet-health reporting across a 245-endpoint estate through a formula-driven Excel dashboard; diagnosed definition-update failures including a TLS/network-path fault in the Windows Update Agent channel.
- Own Azure cost governance for client subscriptions: monthly BOQ-to-actual reconciliation and variance tracking across DDoS Protection, Azure Site Recovery, bandwidth, and reserved instances.
- Executing a P2V migration of a physical industrial PC to Hyper-V for a GxP-regulated pharmaceutical OT environment, resolving cross-subnet SCADA polling and OT/IT network segmentation.
- Monitor estate health with Zabbix, PRTG, LogRhythm SIEM, and Azure Monitor; automate provisioning with PowerShell, Terraform, and ARM/Bicep;

### Senior IT Engineer

#### Minitek Systems India Pvt. Ltd. | Client: KSPG Automotive India Pvt. Ltd

01/2016 - 05/2021 [Pune, IN](#)

- Managed and monitored Windows Server 2008/2012 environments, ensuring continuous system availability, optimal performance, and security compliance
- Administered Active Directory user and group accounts, enforcing Group Policy Objects (GPOs) and access controls aligned with organizational security standards

## EDUCATION

### Certified Cloud Computing & IT Infrastructure Professional

[Jetking Technologies](#)

2012 - 2014 [Pune, India](#)

## SKILLS

### Azure Compute & Storage

[Azure Virtual Machines](#) [VM Scale Sets \(VMSS\)](#)

[Azure Backup](#) [Azure File Sync](#)

[Azure Storage](#) [Recovery Services Vault](#)

### Azure Networking

[Azure Virtual Network](#) [Application Gateway](#)

[Azure Load Balancer](#) [Azure Firewall](#)

[Azure Bastion](#) [VPN Gateway](#) [NSG](#)

[DNS](#) [WAF](#)

### Azure Security & Identity

[Microsoft Entra ID](#) [Azure AD Connect](#)

[Conditional Access](#) [Azure RBAC](#)

[Multi-Factor Authentication \(MFA\)](#)

[Privileged Identity Management](#)

### Disaster Recovery & BCDR

[Azure Site Recovery \(ASR\)](#)

[Business Continuity Planning](#)

[RTO/RPO Optimization](#) [Backup Policies](#)

## CERTIFICATIONS

### Microsoft Certified: Azure Administrator Associate

AZ-104

### Microsoft Certified: Azure Solutions Architect Expert

AZ-305

### Microsoft Certified: Windows Server Hybrid Administrator Associate

AZ-800 / AZ-801

### Microsoft 365 Certified: Enterprise Administrator Expert

MS-102

### Microsoft 365 Certified Messaging Administrator

MS-203

### Cisco Certified: Cybersecurity Essentials & Introduction to Cybersecurity

Information Security

- Deployed OS and application patches using ManageEngine Desktop Central, maintaining endpoint compliance and reducing vulnerability exposure across the enterprise
- Executed system image deployments using Windows Deployment Services (WDS) and Microsoft Deployment Toolkit (MDT), standardizing endpoint configurations across 500+ devices
- Administered enterprise backup operations using IBM Tivoli Storage Manager and TS2900 tape library, ensuring data protection and recovery readiness
- Managed and tracked IT service requests and incidents using ManageEngine ServiceDesk Plus, maintaining SLA adherence and service quality
- Coordinated with hardware and network vendors to resolve escalated infrastructure issues, minimizing business impact from outages
- Provided remote technical support for enterprise users across India, resolving OS, application, networking, and security incidents efficiently

## PROJECTS

---

### Azure Virtual Machine Scale Sets (VMSS) Deployment

- Objective: Enable elastic, auto-scaling infrastructure for client production workloads on Azure
- Technologies: Azure VMSS, Azure Managed Disks, Azure Monitor, PowerShell, ARM Templates
- Responsibilities: Designed golden image creation pipeline, configured flexible orchestration, automated patch lifecycle, and integrated monitoring
- Outcome: Reduced manual VM provisioning effort and improved workload scalability and availability

### Azure Site Recovery (ASR) Implementation for Business Continuity

- Objective: Improve disaster recovery readiness and minimize RTO/RPO for critical production workloads
- Technologies: Azure Site Recovery, Recovery Services Vault, Azure Virtual Machines, Azure Networking
- Responsibilities: Architected full ASR deployment, configured replication policies, tested failover procedures, and validated BCDR documentation
- Outcome: Achieved enterprise-grade disaster recovery posture with automated failover, improving business continuity and compliance readiness

### Hybrid Identity Deployment with Azure AD Connect

- Objective: Unify on-premises Active Directory with Microsoft Entra ID across 10+ client environments
- Technologies: Azure AD Connect, Password Hash Synchronization, Microsoft Entra ID, Conditional Access, MFA
- Responsibilities: Configured AD Connect sync, designed Conditional Access policies, enabled MFA, and validated SSO across environments
- Outcome: Seamless hybrid identity achieved; improved security with Zero Trust access controls and no user productivity disruption

### VMware NSX-V to NSX-T Private Cloud Migration

- Objective: Modernize network virtualization and improve micro-segmentation in a 100+ server private cloud
- Technologies: VMware NSX-T, NSX-V, vSphere, VXLAN, Distributed Firewall
- Responsibilities: Planned and executed phased migration from NSX-V to NSX-T, redesigned network topology, and validated security policies post-migration
- Outcome: Enhanced network security posture, improved scalability, and eliminated NSX-V lifecycle risk

## STRENGTHS

---

### Structured & Detail-Oriented

Designs and configure systems with a clean, standardized, and well-documented approach, ensuring long-term maintainability and smooth handovers for future teams.

### Fast, Accurate & Results-Driven

Delivering solutions quickly without compromising quality, helping minimize downtime and prevent operational and financial impact.

### Analytical Problem Solver

Takes a methodical approach to troubleshooting by asking the right questions, identifying root causes, and implementing long-term fixes rather than temporary workarounds.

### Multitasking & Prioritization

Comfortable managing multiple projects and incidents simultaneously while maintaining service quality and meeting deadlines.
